SUMMARY

I am passionate about Artificial Intelligence and currently focused on learning Deep Learning using the PyTorch framework. I have a strong understanding of Supervised Machine Learning and good problem-solving skills in Data Structures and Algorithms. I've solved over 320+ problems on LeetCode using Python and actively participate in competitive programming on both LeetCode and Codeforces.

I aim to contribute to the AI research field and grow through hands-on experience and peer learning.

Apart from technical skills, I have strong leadership qualities. I manage tasks efficiently, think strategically, and enjoy guiding my colleagues and working in a collaborative environment.

EXPERIENCE

Freelance Data Scraper

freelancer.com

06/2023 - 06/2023 Remote

Freelance Data Scraper

- Developed and delivered 3 automated data extraction projects using Python, BeautifulSoup, Selenium and requests
- Parsed structured data from e-commerce, job board, and real estate platforms
- Cleaned and formatted datasets for client use in reporting and analysis

EDUCATION

BE – Computer Science and Engineering

Chandigarh University

08/2024 - 05/2028 Chandigarh

Class 11–12

St. Xavier's High School

06/2021 - 05/2023 Odisha

SKILLS

Beautiful Soup	C/C++	CSS
Data Structures	Deep Learning	
Pandas	Git	GitHub
Scikit-learn	JavaScript	Matplotlib
Python	PyTorch	Seaborn
Selenium	Basic SQL	

PROJECTS

AI-Powered Document Summarization and Management Dashboard for KMRL

Key Features:

- Automated **PDF ingestion and text extraction** (PyPDF2 + Tesseract OCR).
- Summarization pipeline** using transformer models (T5, Hugging Face).
- RESTful **Flask backend** for serving summarized data.
- Interactive **React.js dashboard** with alert cards, compliance stats, and project tracking.
- Implemented **CORS middleware & JSON APIs** for smooth frontend-backend integration.
- Designed for scalability to support future AI-driven decision-making.

INTERESTS

- Exploring Tech Trends**
Exploring new advancements in technology and their implications
- Football**
Enjoys playing and analyzing football
- Hackathons & Competitive Programming**
Participates in various coding competitions and hackathons to enhance skills
